EDUCATION

The London School of Economics and Political Science (Maximum Bursary Recipient) ***Sep 2022 – Sep 2025***

- BSc Mathematics and Economics (High 2:1)
- Final Year Dissertation: Using Fractional Brownian Motion (fBm) to model the long-term memory effects in commodity markets.
  - Established theoretical basis for the financial application of fBm models through rigorous proofs of fundamental path properties.
  - Challenged Black-Scholes efficiency assumptions and derived the arbitrage implications in fBm models using stochastic calculus.
  - Compared forecasting models (ARFIMA, GARCH, and fBm) in Python testing prediction accuracy in commodity market volatility.

St Paul's Girls' School, Hammersmith (Awarded Full Bursary) ***Sep 2015 – May 2022***

- A Levels: Mathematics – A*, Further Mathematics – A*, Physics – A*, Economics – A.

PROFESSIONAL EXPERIENCE

Quantitative Investment Associate, Aventur Wealth ***Aug 2025 – Present***

High Growth WealthTech managing £250m+ AUM, democratising wealth management through AI-enabled advisory platform

- Engineered Python-based multi-factor model to optimise sector tilts and geographic exposure to manage tactical equity allocation across multi-asset portfolios leveraging fragmented data signals (economic indicators, sector correlations, earning revisions).
- Authored investment thesis research on European AI beneficiaries, using statistical analysis of semiconductor supply chain, identifying names (ASML, Infineon) trading below DCF valuations through comparative P/E regression, driving portfolio reallocation strategy.
- Executed DCF valuation and liquidity model for UHNW business-owner integrating post-transaction proceeds into Monte Carlo simulations.

Venture Capital Analyst, LSE Generate ***Jan 2025 – May 2025***

Startup accelerator ranked among Europe's top 10 university incubators by Financial Times

- Selected alongside series A/B founders, developing investment analyses for start-ups under mentorship from VC-experts.
- Produced investment pitch book for Allergy Amulet including detailed valuation frameworks, comparable analysis, and market positioning.
- Built 3-statement financial model with 15 sensitivity variables for Allergy Amulet, projecting key metrics and unit economics.

Deals Advisory Intern, Arup ***Jul 2024 – Aug 2024***

Global Architecture, Engineering and Advisory firm

Transaction Experience: Technical and Commercial due diligence for a global infrastructure fund

- Built utilisation model in Excel with 15+ sensitivity scenarios identifying 20% IRR variance between base and downside cases
- Conducted bottom-up TAM analysis for UK alternative-fuel market, using penetration curves and competition across 4 customer segments.
- Authored sections of final report translating technical findings into investment recommendations, contributing to successful bid approval.

Strategy Intern, New Wave Biotech ***Aug 2023 – Nov 2023***

Biotech Start-up developing AI Bioprocess Optimisation Software

- Led team of 6 analysts to deliver growth strategy analysing 200+ biotech targets using EvaluatePharma database and Tableau for figures.
- Analysed relevant data to create tailored sales materials, media content (website, LinkedIn, PR) to boost engagement.
- Using segmentation and targeting techniques, collaborated with co-founders on creation of pitch decks and growth strategy plan.

LEADERSHIP EXPERIENCE

Capital Partnerships Intern, Equitle ***Jul 2025 – Aug 2025***

- Mapped regional lower-middle market PE landscape, synthesising the stated strategies and target check sizes of 20+ funds raising capital.
- Generated 3 active partnership discussions with funds targeting 2.5x+ MOIC through targeted outreach.

Atlas Institute, Political Risk Analyst ***Jan 2025 – May 2025***

- Authored 'Green Industrial Policy and PE Value Creation: Why the IRA and EU Green Deal Create Asymmetric Opportunities in Building Services' – analysing how climate legislation transforms regulatory landscapes for built environment acquisitions.
- Led 5+ interviews with senior logistics executives and trade policy advisors for article 'Supply Chain Regionalisation Trends'.

Phelan United States Research Assistantship ***Nov 2024 –May 2025***

- Selected from a pool of 210 applicants (2% acceptance) to assist project: 'Cooperating with enemies? Evidence from Activists' support for China-targeting Economic Policies in the US'.
- Conducted fundamental economic research and document analysis to categorise activist statements and coalition-building patterns.
- Created dataset tracking 1,000+ stakeholder positions using Python, enabling regression analysis of lobbying effectiveness.

LSESU Developing Markets Society, Head of LATAM Research ***Sep 2024 – Mar 2025***

- Authored research note for 'Green Energy Monthly' newsletter identifying 4 high-potential Chilean clean energy investment opportunities.
- **Case study**: Built DCF model applying Monte Carlo simulations to quantify refinancing risk for the Ruta del Sol Sector 2 concession concluding a >40% probability that project IRR would fall below its cost of capital due to traffic shortfalls and FX volatility.

SKILLS, INTERESTS & ACHIEVEMENTS

- Awarded Distinction in 6 UKMT Mathematics Olympiads
- SEO Alternative Investments Accelerator Programme (2024)
- Commended in UChicago Econometrics Challenge (2024)
- 10-week Venture Capital mentorship programme with Sean Sukonnis (Feb 2025 – June 2025)

Computing: Proficient in Microsoft Excel (VBA) and PowerPoint, Python (Statistical modelling, Optimisation, ML), SQL, R, STATA

Interests: Kickboxing (black belt), Competitive debater (5+ years), Qualified Climber, Ice Skating (7 years), Tennis
